PACS number(s): 78.67.Hc, 42.50.Ex, 78.67.De, 99.10.Cd

The coupling values  $g_{1,2}$  extracted from the data in Fig. 2 using Eq. (1) are not  $30 \mu\text{eV}$ , as stated, but  $75 \mu\text{eV}$ . The error comes from a mistake in the fitting procedure. As a consequence, the interdot effective coupling is  $J \cong 11 \mu\text{eV}$ , instead of  $2 \mu\text{eV}$ . None of the conclusions is affected by this change.
